limitations to warrant a rejection under 35 USC 102 or 103. Specifically, in reference to independent claim 1, none of the prior art either alone or in combination disclose or teach of the claimed method for producing a spectacle lens specifically including, as the distinguishing features in combination with the other limitations, varying a magnification for each lens of the lens pair based on the resolution determined, wherein the magnification is varied without substantially varying the refractive power of the lens pair and with the term "without substantially varying the refractive power" defined in the specification, page 3, line 13 as 'the dioptric power changes less than about 0.01 diopters'.

Examiner's Comments

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because it does not identify the citizenship of each inventor. Specifically, the citizenship of inventor Richard J. Nason was not provided on the declaration.

Applicant's election without traverse of Group I, claims 1-10 in the reply filed on April 23, 2007 is acknowledged.

For applicant's information, the drawings received March 18, 2004 have been approved by the examiner.

Caplan et al, Peli et al, and Klempa are being cited herein to show methods for producing spectacle lenses having some similar method steps with that of the claimed invention.

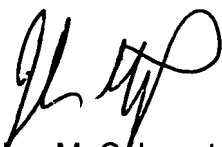

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
